We don't hide our prices. Below are some of the tax packages we offer:

Services Provided for Tax Returns

Premium Audit Protect:

Premium audit protection responds to any audit and covers all fees including court costs, interest, and penalties which may be charged. Your case will be argued by a licensed attorney.

Tax Consultation:

We provide our clients with individualized suggestions on how to reduce their taxes for the current and future years through saving for retirement, education, the recognition of capital loss, deductions and much more.

Advance Tax Planning:

Advance tax planning includes everything offered in the tax consultation. In addition we prepare individual tax scenarios to show the effect that any change will have on your taxes.

What a Tax Package Includes

Tax packages simplify our pricing. They provide prices for a typical taxpayer such as someone who might own a home or operate a business. We attempt to include in the price most of the common schedules and forms associated with each situation. For example, homeowners typically have families so their package includes filing not only for a spouse but also up to four children. It also includes most Schedule A deductions such as mortgage interest and charitable deductions. However, this tax package doesn't include every possible deduction or credit a family who owns a home might have. If the family has a child in college who qualifies for the Hope or Life-time learning credit, they will be charged an extra \$12 for filing for this credit. Additional credits typically cost between \$10 and \$20 depending on their difficulty. If you have questions about a specific credit or deduction you can contact our office for details.
